CYBER KNIGHTS ENTERPRISE - INFOSEC POLICY

Version 3.0 (Active) | Effective: Jan 1, 2025 | Expiration: Indefinite / Active

SECTION 1: REMOTE NETWORK ACCESS

1.1 All remote connections require Zero Trust Network Access (ZTNA) with continuous posture check.
1.2 Maximum idle session timeout is 30 minutes. Re-authentication is enforced at every resumption.

SECTION 2: PASSWORD AND AUTHENTICATION STANDARDS

2.1 Traditional passwords are deprecated in favor of FIDO2 WebAuthn hardware keys (YubiKey 5).
2.2 For fallback systems requiring passphrases, minimum length is 16 characters with no periodic rotation.
2.3 SMS-based 2FA is strictly banned due to SIM-swapping risks. Only FIDO2 hardware keys allowed.

SECTION 3: HARDWARE AND DEVICE MANAGEMENT

3.1 BYOD personal devices are 100% prohibited across all departments without exception.
3.2 Only company hardware with CrowdStrike Falcon EDR, TPM 2.0, and remote wipe is permitted.

SECTION 4: DATA TRANSFER AND ARTIFICIAL INTELLIGENCE USAGE

4.1 USB storage ports remain permanently disabled at hardware BIOS level.
4.2 Corporate AI Policy: Employees may only use internal offline document systems (RAGNext/Ollama). Uploading internal source code or customer PII to public cloud AI tools is a critical violation.
